

SECTOR VP 17dBi - INT-SHP-17/24-H

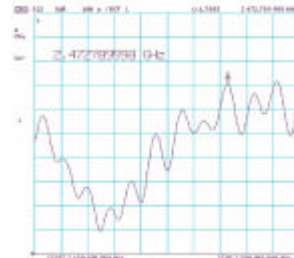

HORIZONTAL

VERTICAL

VSWR (max) 2400 - 2500 MHz

Technical Specification

Electrical

Gain	17 dBi
Frequency	2400 - 2484 MHz
Polarization	horizontal
Front/Back ratio	>35 dB
Half power beamwidth horizontal	87°
Half power beamwidth vertical	7°

VSWR	1.7:1
Impedance	50 OHm

Mechanical

Socket/Plug	N female socket
Dimension	1070 x 109 x 41 mm
Weight	2,6 kg
Mounting	fi 38÷51

key features

- Aluminum, polished casing enables work in heavy weather conditions.

recommended as

- Base station antenna in locations, where you have to connect many wireless devices. You can tilt this SECTOR down to achieve strong signal level. When number of users arises, put next sector on your mast, connect next access point. Your network grows - you keep control.
